DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions
be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To
ensure consideration of such an amendment, it MUST be submitted no later than the payment
of the issue fee.

- 2. Authorization for this examiner's amendment was given in a telephone interview with Dennis P. Cawley (44,598) on January 25, 2005.
- 3. The application has been amended as follows:
 - In Claim 16 (line 7), change to "the temperature of the rotor magnet."
 - In Claim 22, (line 11, second equation) change the equation to the following: $\tau = [k_t \ (T^{\circ}C)I_s] \cdot \tau_{remaining}$,

Allowable Subject Matter

- 4. Claims 16-23 are allowed.
- 5. The following is an examiner's statement of reasons for allowance:
 - With respect to claim 16, the primary reason for allowance is because the Prior Art does not disclose a method of calculating the output mechanical torque generated by a motor based upon the actual temperature of the rotor magnets, where the actual temperature of the rotor magnets is calculated based on a determined offset between a local temperature inside the motor, the determined temperature of a rotor magnet, and a received temperature signal.

6. Therefore, based on the arguments and amendments presented by the Applicant, the Examiner acknowledges the Prior Art fails to make obvious the Applicant's claimed invention.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
